Dr. J. Lederberg,
Department of Genetics,
College of Agriculture
University of Wisconsin
Madison Wisconsin.

Dear Dr. Lederberg,

I apologize for never thanking you for your kindness in sending me a sample of ONPG, while I worked at the Carnegie Institution in Washington. Your sample was of great value to me, and lasted for a long time after I had introduced a micromodification of your method. I am at the moment preparing my work in US for publication, and it would therefore be a great help for me if you would kindly send me a reprint of your paper in J. Bact. 60, 381, and later papers on the same subject, which I may have overlooked.

Sincerely

Søren Levtrup
